

SCHOOL HYGIENE AND AWARENESS ON CLEANLINESS

- The school premises will be cleaned and sanitized according to the guidelines before a group of students physically attend classes in the school, this will be done at the end of each rotation.
- Availability of Protective equipment (Mask, Face shield, Sanitizers, Gloves, PPE etc.)
- Implemented Cleaning and Hygiene procedure for various work stations on daily basis (School bus arrival, Stores, Front desk etc.)
- Awareness and training to all the support staff members about importance of cleaning, disinfecting and hand washing techniques

- School is maintaining checklists for cleaning and disinfecting.
 1. Checklist on cleanliness of the school
 2. Checklist on clinic cleanliness
 3. Checklist on Isolation ward cleanliness
 4. Checklist on daily bus cleanliness
 5. Checklist on frequent classroom cleanliness.

IMPLEMENTATION OF HYGIENE AND SAFETY MEASUREMENTS

Health education on hand washing held by School Doctor

Objective : To introduce the importance of hand washing to the students and follow it every day to lead a healthy life.

Health education conducted by our school doctor Dr. Rehman, on Hand washing technique to the students.

The session started with a power point presentation and discussed on what is hand washing, when we have to wash our hands, why and finally taught them how to wash the hands. Doctor demonstrated hand washing techniques and some of the children voluntarily came to do the hand washing techniques.

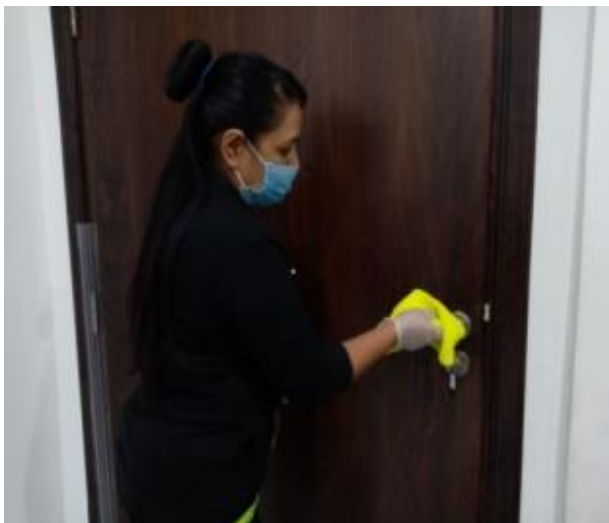

By the end of the session, the doctor recapitulated the important points with the students. He asked questions to them and the children were excited to answer all questions.

Outcome : Students enjoyed the session and revised the techniques of hand washing.

Staff cleaning the workplace

BETTER SAFE THAN SORRY
